

UAB “Ramus Baltic”

Company profile

Company introduction

UAB "Ramus Baltic" is an electrical engineering service company. We offer high quality products, engineering solutions and services for electrical power generation, transmission, distribution and railway network.

UAB "Ramus Baltic" is a private limited liability company from Lithuania. It was founded in Kaunas in 2008.

Our team of highly skilled professionals is English and Russian speaking and has a lot of international experience. We believe that we can be a valuable partner for you.

Our activities

Design of electrical switchyards and transformer substations up to 400 kV, including relay protection, automation, control systems, SCADA systems, telecommunication equipment and all other parts of the project.

Delivery of equipment - we supply high-quality electrical equipment for transformer substations, power plants and industry. We work with producers like ABB, ALSTOM-GE, Siemens, Mors Smitt, Terasaki and many others that have proved their reliability during the years.

Installation supervision - our experienced staff supervises erection, cabling and installation of the electrical equipment on site. We ensure work quality and mounting of valuable equipment in proper way.

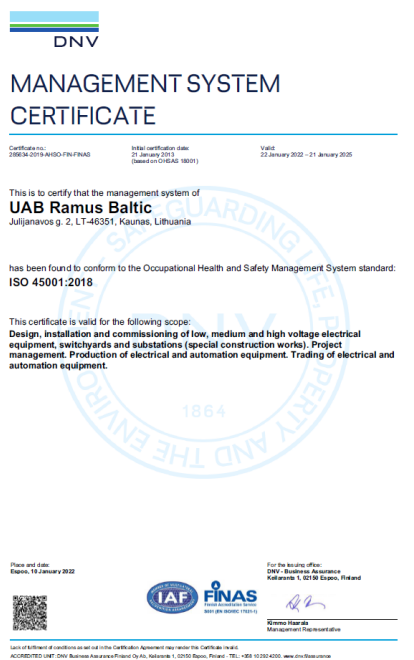

FAT (factory acceptance test), configuration and commissioning of relay protection and automation, remote terminal units (RTU), control systems, SCADA systems – that's where we are the best!

Customized production - We design and assemble various customized cabinets for relay protection, automation, synchronization, remote control, communication equipment, marshalling cubicles. Customized and cost-effective solutions according to your needs!

Project Management - We take full responsibility for the project implementation: to deliver on specification and performance, to be within the budget and to be on time. Turn-key solution is what you need.

In order to improve our service quality, the company has implemented integrated quality, environmental protection and occupational health and safety management system in accordance to requirements of the international standards **ISO 45001:2018, ISO 9001:2015, ISO 14001:2015**.
